SUMMARY

Frontend and mobile specialist with full-stack experience in end-to-end development and ownership of web and cross-platform mobile applications. Proven record of shipping intuitive, user-focused applications across the full product lifecycle, from design and implementation through deployment and maintenance.

TECHNICAL SKILLS

Languages: JavaScript, C#, SQL, HTML, CSS

Frontend & Mobile: React, React Native, Angular, .NET MAUI, Redux

Backend: Node.js, Express, .NET, REST API Development, SQL Server

EXPERIENCE

Senior Frontend & Mobile Engineer (formerly Frontend & Mobile Engineer)

ViviScope | October 2022 – Present | Remote

- Led development of 7 production applications, including 2 React Native mobile apps, 3 .NET MAUI mobile apps, and 2 web applications
- End-to-end ownership of 4 applications, including UI/UX design, frontend architecture, API development, database integration, and deployment workflows
- Led redevelopment and deployment of a cross-platform mobile application, reducing user-perceived crash rates from approximately 50% to under 2% after replacing a legacy native Android implementation
- Managed deployment and maintenance of React Native and .NET MAUI mobile applications across the Apple App Store and Google Play Store
- Designed and implemented reusable frontend architecture used across multiple web and mobile applications.
- Leveraged AI-assisted development tools to accelerate implementation, debugging, optimization, and feature delivery across mobile and web applications

EDUCATION

Grace Hopper Program at Fullstack Academy

Software Engineering Immersive

A.S. Computer Information Systems – Web Development & Programming

Quinsigamond Community College

B.S. Wildlife & Fisheries Conservation

University of Massachusetts Amherst
